20th–24th April 2026

List of the Startups

S.No	Name of the Startup	Incubated At	Brief Description
1	Automind Dynamics Pvt Ltd.	ArtPark, IISc Bangalore	Automind Dynamics is a deep-tech AI startup, incubated at IISc's ART-PARK, developing advanced autonomy software for ground vehicles and mission-critical mobility systems. By combining AI, perception, and sensor fusion, it enables reliable operation in complex, GPS-denied environments, delivering scalable solutions that enhance safety, performance, and operational efficiency.
2	Koshur Scientist	University of Kashmir	Koshur Scientist is an AI-powered edtech startup in Kashmir, transforming K–12 education through a holistic, personalized approach. It combines academics, skill development, and mental health support in one platform. With 300+ videos and 500K+ views, it has impacted 2,000+ students, offering an AI-driven LMS with tailored learning and insights.
3	Walford Capitals	University of Kashmir	Walford Capitals is building an institutional-grade investment research and analytics platform for modern investors. It enables users to test, analyze, and deploy financial models—from fundamental analysis to advanced quantitative strategies—within a unified system. By combining strong data infrastructure with powerful analytics, it streamlines research and makes professional-grade investing more accessible and efficient.
4	Rafa Academy	University of Kashmir	Rafa Academy, founded in 2023, aims to make quality, concept-driven education accessible and affordable. Based in Srinagar, it offers offline classes, online learning across Jammu and Kashmir, and home tuition services. With a focus on conceptual clarity and consistency, Rafa Academy helps students build strong academic foundations for long-term success.
5	NeuroPulse AI	University of Kashmir	NeuroPulse AI is an assistive neuro-diagnostic platform that streamlines EEG workflows by reducing hidden clinical workload and improving transparency. It enhances review speed with signal analysis, artifact annotation, and explainable summaries—without replacing doctors. Its “effort transparency” layer supports accurate billing and documentation, boosting efficiency, revenue integrity, and trust, with plans to expand into ECG and radiology.
6	Rawalab Pvt. Ltd	University of Kashmir	Rawalab is an agritech startup building affordable, AI-powered irrigation automation for small and mid-sized farms. Its system uses sensors and AI to optimize water use, detect crop diseases early, and improve yields. Designed for offline functionality and ease of use, Rawalab delivers practical, intelligent farming solutions to rural communities.
7	Apple Guard	University of Kashmir	AppleGuard, by AgroSense Technologies Pvt. Ltd., is a smart IoT-based solution designed for apple farmers. It enables real-time monitoring of orchard conditions, helping optimize irrigation and pesticide use. By delivering actionable insights, AppleGuard improves crop health, enhances productivity, and supports more efficient, data-driven orchard management.

S.No	Name of the Startup	Incubated At	Brief Description
8	BrandSparc	University of Kashmir	BrandSparc is an AI automation and software solutions agency that helps businesses grow smarter and faster through modern technology. It builds intelligent systems, including AI automations, custom software, and websites, to streamline operations, reduce manual work, and enhance efficiency with scalable, data-driven solutions.
9	Salmoe Pvt. Ltd.	University of Kashmir	Salmoe aims to make rainbow trout more accessible by delivering premium, artisanal produce from Himalayan fishermen to cities across India. By bridging the gap between local producers and urban consumers, it ensures high-quality sourcing, freshness, and a sustainable supply chain for this nutritious delicacy.
10	Switch Electric	University of Kashmir	Switch Electric Private Limited is an innovative e-mobility startup focused on making sustainable transportation affordable and accessible across India. By developing cost-effective electric mobility solutions, the company aims to reduce carbon emissions, promote clean energy adoption, and accelerate the transition toward greener, more efficient transportation systems.
11	IIS Intelligence	University of Kashmir	An edtech startup focused on improving school performance through data-driven solutions. It equips institutions with tools to enhance teaching quality, track student progress, and streamline operations. By leveraging technology, it helps schools achieve better academic outcomes, informed decision-making, and overall institutional efficiency.
12	Hirepedia	University of Kashmir	Hirepedia is an AI-powered recruiting platform that replaces traditional resumes with verified portfolios. It enables candidates to showcase real skills and achievements while helping employers assess talent more accurately. By focusing on proof of work, Hirepedia streamlines hiring, reduces bias, and improves the quality of recruitment decisions.
13	EcoBuddy	University of Kashmir	EcoBuddy is a tech-enabled recycling startup focused on transforming packaging waste management through convenient and sustainable solutions. It offers doorstep collection of corrugated waste from individuals and businesses, converting it into reusable materials while rewarding users. By combining technology with circular economy practices, EcoBuddy promotes responsible recycling and environmental impact.
14	Organico	University of Kashmir	Organico is a brand focused on researching and developing "honeydew honey," a rare variety made from tree sap rather than flower nectar. It also explores natural honey infusions and innovative packaging solutions, aiming to deliver high-quality, sustainable products that highlight nature's unique offerings.
15	Stellar Dynamics	University of Kashmir	Stellar Dynamics is a deep-tech startup developing advanced plasma-based technologies for space propulsion and research. It builds compact satellite propulsion systems and modular plasma platforms, making high-end testing more accessible, scalable, and cost-efficient. The company aims to accelerate innovation across spacetech and scientific applications.

S.No	Name of the Startup	Incubated At	Brief Description
16	KashBrew Innovations	University of Kashmir	KASHBREW Innovations is a technology-driven startup automating traditional beverages. Its flagship product, an Automatic Pink Tea (Nun Chai) vending machine, delivers fast, hygienic, and consistent preparation of authentic Kashmiri tea using real ingredients. The solution is designed for scalability across institutions and commercial environments.
17	MamaSolutions	University of Kashmir	MamaSolutions is a purpose-driven company creating practical innovations to make everyday life safer and easier, especially for women and the elderly. Its solutions, like the Smart LPG Cylinder Carrier, reduce physical effort and improve safety. The company focuses on user-friendly, reliable products that bring comfort and peace of mind to households.
18	Al Ibra Souq Ventures	IUST, Kashmir	Al Ibra Souq Ventures specializes in elegant calligraphy frames and artistic designs. It offers customized Islamic calligraphy and decorative pieces for homes, offices, and gifting. Focused on craftsmanship and creativity, the brand promotes traditional art through beautifully designed, handcrafted products that blend cultural heritage with modern aesthetics.
19	Sehatsehul	University of Kashmir	Sehat Sehul is a Kashmir-based digital healthcare platform making medical services more accessible and convenient. It connects patients with trusted nurses, diagnostic labs, and pharmacies, delivering care at their doorstep. By bridging gaps in home healthcare, it also empowers local providers and creates opportunities for skilled professionals within a unified ecosystem.
20	Al Shuhul Concretech Engineering Services Pvt. Ltd.	IUST, Kashmir	Al Shuhul Concretech Engineering Services Pvt. Ltd. is an ISO-certified company specializing in eco-friendly and innovative green concrete solutions. It develops advanced materials like self-healing concrete and UHPC to enhance durability while reducing carbon emissions. With a focus on sustainability and innovation, the company aims to transform modern infrastructure and promote responsible construction practices.
21	Khan Kesar Kashmiri Walla	University of Kashmir	Khan Kesar Kashmiri Walla delivers authentic, organic products sourced directly from the valleys of Kashmir. Its offerings include pure Kashmiri saffron, natural shilajit, and premium dry fruits. Committed to quality and authenticity, the brand brings nature's finest treasures to customers with guaranteed purity and trust.
22	Sky Robo Drones Pvt.Ltd	NIT, Srinagar	M/s SKY ROBO DRONES Pvt. Ltd. is a cutting-edge startup developing advanced drone solutions for high-altitude surveillance and defense. Its drones feature thermal imaging, real-time data transmission, and AI-powered analytics, ensuring reliable performance in extreme conditions. Designed for precision and durability, the company enhances situational awareness and supports mission-critical defense operations.
23	Project Vision Cosmos Pvt Ltd	NIT, Srinagar	Vision Cosmos makes astronomy accessible through immersive, hands-on experiences for students and enthusiasts. From solar observations to night sky exploration, it uses advanced telescopes and guided sessions to spark curiosity about the universe. Incubated at NIT Srinagar, the startup blends education with real-world discovery to inspire the next generation of learners.

S.No	Name of the Startup	Incubated At	Brief Description
24	JK Green Technologies LLP	NIT, Srinagar	JKGT Team is empaneled with JAKEDA and KPDCL, delivering renewable energy and smart power solutions. Partnering with industry leaders and a member of IGBC, it promotes green tourism and energy-efficient homes. Focused on reducing carbon footprints, JKGT supports sustainable hospitality and smarter, eco-friendly buildings across the region.
25	Heaventure Adventure Private Limited	NIT, Srinagar	Curve Electric is a green mobility startup revolutionizing urban transport with e-bike sharing solutions. Founded in 2023, it launched Jammu & Kashmir's first public e-bike system, offering GPS-enabled rides via a seamless app. Focused on sustainability and convenience, it reduces emissions while providing affordable, eco-friendly commuting options.
26	DreamCabs KMR Pvt Ltd	NIT, Srinagar	Curve Electric is a green mobility startup transforming urban transport with app-based e-bike sharing in Jammu & Kashmir. Its GPS-enabled e-bikes offer affordable, eco-friendly commuting while reducing congestion and emissions. DreamCabs complements this vision with an AI-driven cab platform, enabling multilingual bookings and fair pricing to make mobility more accessible and inclusive in emerging cities.
27	Team INFRGY and PRIMEMOVR	University of Kashmir	INFRGY/PRIMEMOVR is an innovative energy-harvesting prototype that captures radio frequency and ambient electromagnetic signals, converting them into usable DC power, with optional AC output. Using a patent-pending design, it enables efficient wired or wireless energy transfer while enhancing output through additional harvested energy from the environment.
28	A Olive Foods (Red Stone)	IUST, Kashmir	A Olive Foods (Red Stone) is a Kashmir-based food and beverage brand located in Arihal, Pulwama, Jammu and Kashmir, India. Known for its "Red Stone" range, the company produces flavorful drinks using quality ingredients, aiming to deliver refreshing taste experiences and innovative beverage options for diverse consumer preferences.
29	Kumhar Tech Solutions LLP	IUST, Kashmir	Kumhar Tech Solutions is a technology-driven firm based in Anantnag, Jammu & Kashmir, specializing in innovative IT and digital solutions. Established in 2025, the company focuses on delivering scalable services and modern technology support, helping businesses enhance efficiency, streamline operations, and adapt to evolving digital environments.
30	KFG Foods Pvt. Ltd	IUST, Kashmir	KFG Foods Private Limited is a bakery manufacturing company based in IGC Lassipora, Pulwama, Jammu and Kashmir, India. Incorporated in May 2024, the company produces quality bakery products and is led by directors Fayaz Anjum Wani and Rifat Ara.
